## About the book:

This new book is a fresh look at New Zealand's top architects, exploring how their outstanding residential designs work together with New Zealand's unique and beautiful landscape. A coffee table book, with 188 pages filled with spectacular panoramic landscape photographs and singular contemporary architecture.

Each architectural project is introduced by a panoramic landscape photo of the area with text describing the region. Stunning photos represent the house itself on the following 6 pages, conveying a real idea of the look as well as the feel of the design. Floor plans of each project are portrayed at the end of the book to give you a better overview of the layout.

This contemporary coffee table book is something different to the norm - perfect as a special gift for clients and friends who have an interest in aesthetics and design.
